Mid City Bank, Omaha, Neb.

SPECIAL REPORT

Flooring Trends: Laying the Groundwork

SPEC SOLUTIONS

Sometimes the best solution to a programmatic issue is to think inside the box. In this particular performance venue retractable metal mesh panels help make the theater more intimate when need be. [PAGE 84]

GLASS, WOOD OR BOTH?

ALNOART Woodglas from **Alno** illustrates nature without the need for real exotic wood veneers. The glass program creates simulated wood finishes with patented ink-jet technology which prints directly onto the kitchen cabinet doors to create a book-matched veneer effect. Brazilian Rosewood, Zebra and Beach Heart exotic wood grain finishes are available. Visit www.alnouse.com or Circle 431

ECO-SMILE TILE

Mural and accent tiles from **Stone Impressions** are created using an artist-developed process to hand print designs on stone. The tiles are ideal for murals, accents and listellos. Eco-friendly stone tiles express the warmth and texture of natural stone, but are made from recycled materials. The sustainable tiles feature rich colors and a texture palette similar to travertine and limestone. Trim and accent pieces made of recycled aluminum, brass, glass and reclaimed wood add pizzazz. Visit www.stoneimpressions.com or Circle 430

SCULPTURAL BATHING VESSELS

The Inspired Design Collection of hand-sculpted solid stone soaking baths from **Advent Design** is fashioned for unsurpassed comfort. The baths are a novel combination of function and sculptural design to become the showpiece of any interior. Visit www.adventstone.com or Circle 429
