## Product Review

20.

21.

22.

20. **Stone Forest** uses bamboo, a 100% renewable resource, in the manufacturing of its Moso and Quattro Bamboo Vessel sinks. Lightweight and water-resistant, the vessels are crafted from the laminated exterior of a bamboo shoot.  
**Circle No. 249 on Product Card**

21. The InviaLED energy-saving display and accent lighting solutions from **W.A.C. Lighting** uses the latest LED technology. The InviaLED Tape Lights use two watts per foot, and have a life expectancy of up to 50,000 hours, operating on a 12-volt AC Class II power supply center.  
**Circle No. 250 on Product Card**

22. Created by **Totally Bamboo**, this solid bamboo vessel sink is created by master craftsmen who hand-turn each piece on a huge lathe and rub the finish to a low satene sheen. Each sink, made from 100% renewable Moso bamboo, is sealed with a waterproof polyurethane to create a durable piece that carries a 10-year guarantee.  
**Circle No. 251 on Product Card**

23. The Mid-Century Modern cabinet collection from **Neil Kelly Cabinets** features 10 contemporary styles all crafted from non-toxic materials. The collection's cabinet boxes are made using a no-added urea formaldehyde agri-board, solid wood and veneers from sustainable resources, low VOC glues, binders, adhesives and natural furniture-grade finishes.  
**Circle No. 252 on Product Card**

24. The Leaf chandelier from **Bear Creek Glass** is comprised of hundreds of hand-blown and shaped glass pieces, and makes use of Solid State/LED (SSU) advanced technology. Since SSL fixtures use semi-conducting materials to convert electricity directly into light, they are more energy efficient than traditional light bulbs.

23.

28. A line of environmentally friendly accent, mural and border tiles from **StoneImpressions** are similar in look and texture to natural stone, but are made of a composite using recycled materials.  
**Circle No. 257 on Product Card**

to its Casa California  
an extensive line of  
silica sand, with  
glass and/or glass

27.

with no added urea formaldehyde, and also make use of AyA's low HAPs (hazardous air pollutants) finishes and UV cured top coat finish. EVO cabinets are made from 100% recycled wood products and with only EPP certified (Environmentally Preferable Product) 100% post-industrial wood fiber particleboard.  
**Circle No. 255 on Product Card**

27. The AP-1207BH air purifier from **Coway** filters out pet dander, dust, germs, cigarette smoke, viruses and animal odor with more than 99.9% efficiency. Its five-stage filtration system includes a gold-coated pre-filter, polyester filter, Oriental Medicinal Herb filter, HEPA filter and activated carbon filter.  
**Circle No. 256 on Product Card**

28.

29.

28. A line of environmentally friendly accent, mural and border tiles from **StoneImpressions** are similar in look and texture to natural stone, but are made of a composite using recycled materials.  
**Circle No. 257 on Product Card**

29. The bamboo vessel sink bowl from **Eden Bath** is handcrafted from real bamboo. It is created from stacking multiple layers of bamboo sheets together and then turning them on a lathe. Two carbonized layers of bamboo are added near the top to create a dimensional effect, and the rim is tapered outward.  
**Circle No. 258 on Product Card**

30. **Forbo Flooring Systems** has added colors and patterns to its Marmoleum sheet line of flooring: Prisma, Mineral and Graphic. Prisma, inspired by the light-separating properties of the prism, consists of two families of patterns. Mineral's neutral patterns are derived from the look of natural stone. Contrasting black and white and subtle shades of gray make up the Graphic collection.  
**Circle No. 259 on Product Card**

30.

31.

31. The Bazeo kitchen from **NYLoft** is a European-style kitchen that meets stringent green requirements. The kitchen features counters and fronts that are made from 100% recycled paper and water-based resin with no detectable formaldehyde emission.  
**Circle No. 260 on Product Card**
